City, Plat and ARB maps

Ranchos/Sectionals

Back Plant Services put hard-to-find documents within reach

While title plants are becoming more comprehensive and automated, on occasion you may need to reach back to paper-based plants to locate historical documents, maps and other records. Our back plant resources are among the most robust in the nation and our search staff the most experienced when it comes to researching historical land records.

Back Plant Services vary by market depending on document resources, so speak with your Account Manager to learn what is available in your markets.

Back Plant Services can fulfill the following requests:

- Deeds and other recorded documents not available in electronic plants
- Grantor-Grantee and Property chains
- Residential and commercial search packages that include a title chain, starter record, deeds, map images and current taxes
- Tract book, plat book, condo book and deed book searches

Most standard reports can be fulfilled in 24-48 hours. Same-day service is available in some markets. Commercial and customized searches may require three days or longer to fulfill.

Back Plant requests can be fulfilled by FAX, postal mail or express delivery (including courier).

Back Plant Services are billed at an hourly rate or per document and are subject to a services agreement. There is no monthly minimum. Speak with your Account Manager to learn which program is best for you.
