

Property Insight National Coverage

A National Perspective

Property Insight currently manages title-related information databases covering nearly 200 counties across 15 states and maintains regional operations and processing facilities in six states.

We continue to increase the size of our geographic footprint to offer products and services in more markets by acquiring more data. As customers re-align their businesses from a local to a national focus, we are harnessing resources to become a nationwide provider, offering broader and more varied services.

Our success is founded on three basic disciplines: continuous improvement of our data, product performance and close relationships with our customers. These fundamentals help guide our national focus and our vision for the future of information technology.
